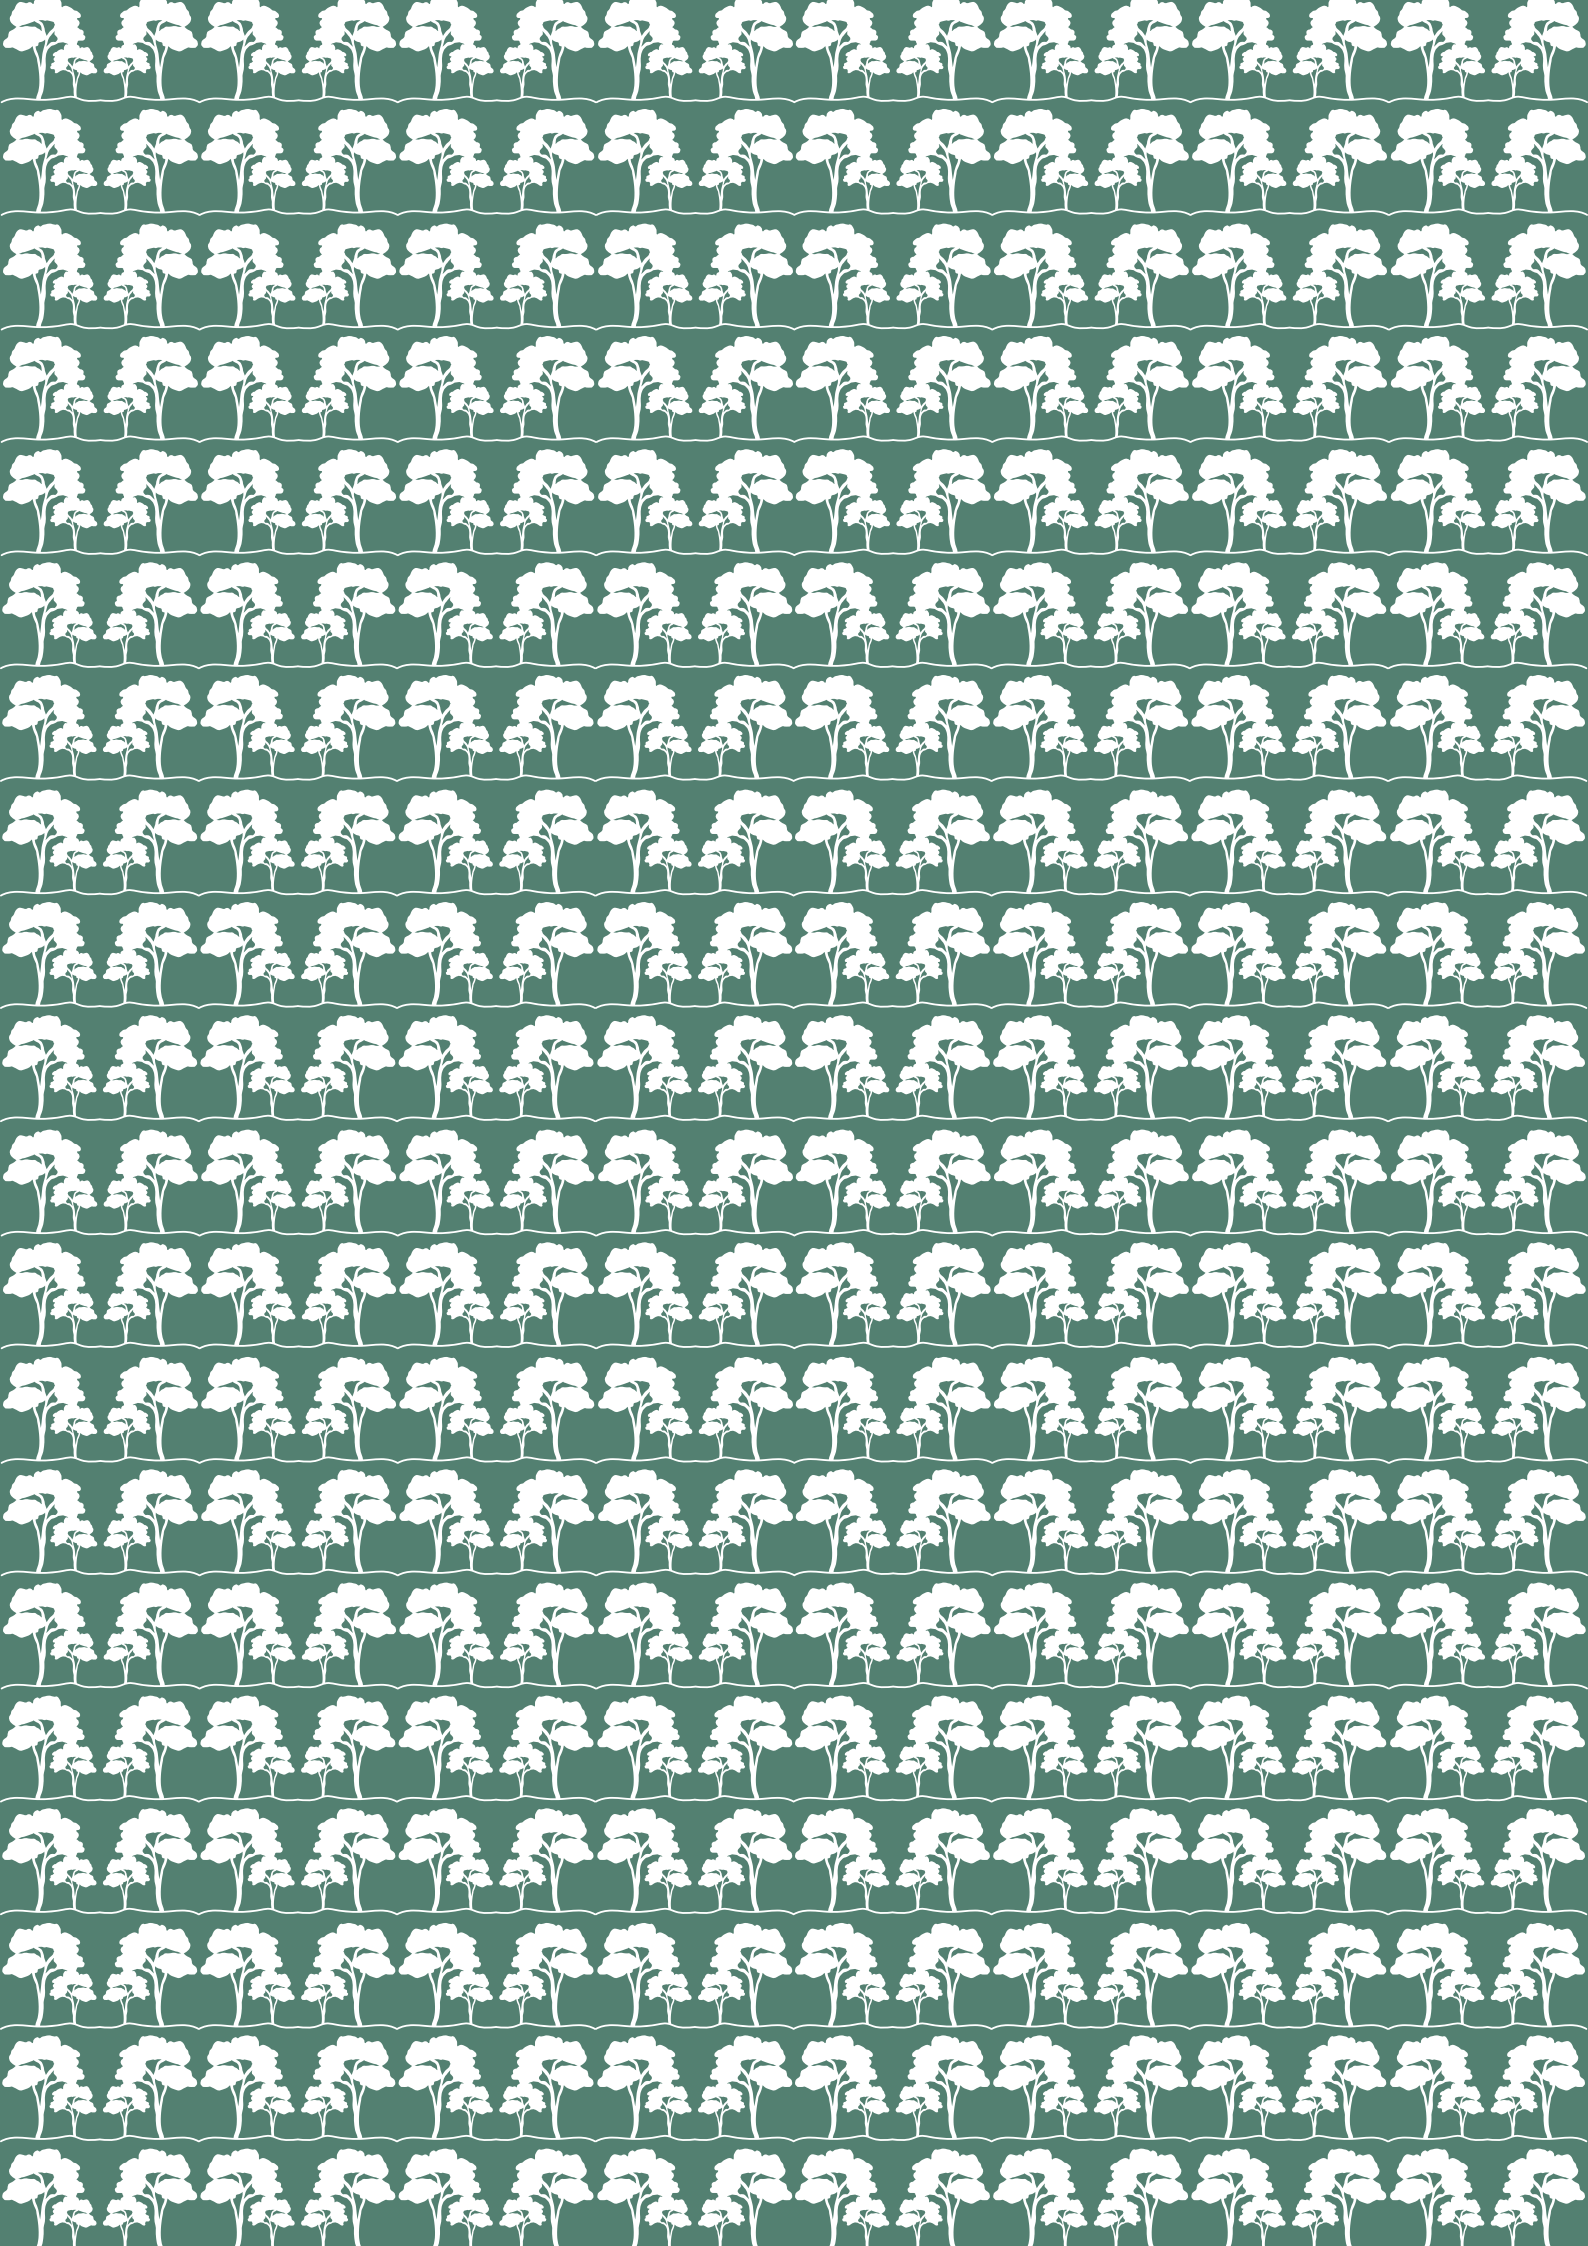
L'ART DE VIVRE EN PLEIN AIR



THE ART OF OUTDOOR LIVING

Manufacturer of mobile homes decking
and designer of outdoor living spaces

ÉDITO

Another season draws to a close for outdoor hospitality professionals. And what a year it has been !

For us, this season has been particularly stimulating: busy out in the field, bringing projects to life, and equally intense behind the scenes, where our teams have handled a high volume of requests. We have achieved our goals and, most importantly, satisfied our customers, with a constant focus on delivering every project on time. No two seasons are ever quite the same. Just like you, we are constantly adapting to new challenges, new expectations and new opportunities. And that, precisely, is what makes our profession so rewarding, and so rich.

Since 2025, we have had a dedicated sales team visiting campsites directly to better understand your needs and to help you make the most of your outdoor spaces. We have a real connection with independent campsites and we are proud to support them as they grow. At the same time, working with larger groups gives us the opportunity to expand and develop our presence across Europe.

Our commitment to offering quality products and services remains unchanged and has been strenghtened by the introduction of more structured processes. From project management and design to installation, travel and invoicing, these internal improvements save valuable time for our team and for our customers, helping to make everyday life easier.

Our sector can feel like a long sprint from January to July, with the season getting a little longer every year. Despite a demanding workload, we remain fully committed to our CSR approach. Following our first carbon footprint assessment in 2025, we have now put our environmental charter in place, built around four fundamental commitments: looking after our teams, respecting our clients, protecting nature and building relationships based on trust.

These new actions reflect our continued progress as we move forward steadily and sustainably, together.

Yours sincerely,
Elsa COURREGELONGUE, Chairperson and Chief Executive Officer

HISTORY

A family business at the service of outdoor accommodation

From sawmill to mobile home decking : a bit of history

Located in Biscarrosse in the heart of the Landes, between forests, lakes and the ocean, and surrounded by over 180 campsites, Biscabois is rooted in the history of the outdoor accommodation sector due to its geographical location. Indeed, from the sawmill to the mobile home decking, it was only a step, and the evolution of the material towards its transformation happened naturally.

Biscabois : french leader in mobile home decking

Biscabois offers a wide range of classic and innovative products designed for campsites in France and Europe, ranging from mobile home decking to outdoor landscaping, including canopiesand accessories. With 23 years of experience, Biscabois benefits from solid expertise that makes it a key player on the French market.

Cross-functional skills at the service of the client

In 2023, Biscabois had a team of nearly 95 employees spread across different departments, including a sales team, a technical and after-sales service department, a design office, a communication department, an administrative and accounting office, as well as a team of specialists dedicated to park management, delivery and installation.

Customised outdoor landscaping

Campsites are looking to stand out by offering personalised outdoor spaces. At Biscabois, we offer a standard and bespoke range to meet all space enhancement needs and every desire for expansion, from pergolas to pool deckings, including performance stages, technical rooms, fences...

A design office for bespoke campsites

Whether it comes to mobile home decking or outdoor landscaping, Biscabois provides its clients with a design office to bring unique and innovative projects to life. From design and manufacturing to installation, Biscabois takes charge of the entire project and reinvents the art of outdoor living.

Espace Mobil-Homes : sale and buyback of pre-owned mobile homes

Espace Mobil-Homes is a subsidiary of Biscabois which offers a wide selection of pre-owned mobile homes. With regular arrivals of mobile homes of different sizes, brands and budgets, professionals and individuals will find the mobile home that meets their needs thanks to approachable and attentive contacts.

KEY FIGURES

Performance and equipment

As the French leader in mobile home decking and outdoor landscaping for the outdoor accommodation sector, Biscabois puts a team of qualified and committed professionals at your service. Together, we work every day to enhance numerous campsites in France and Europe.

CSR AND SUSTAINABLE APPROACH

1. Our CSR approach : giving meaning to our spaces

Our activity and our corporate purpose : the art of outdoor living

Designing and landscaping comfortable, sustainable spaces that are perfectly integrated into their environment: this is the mission that drives us on a daily basis. Our ambition is to become the benchmark partner for campsites and outdoor accommodation professionals. To achieve this, we rely on our experience, our advice, our design office and our technical and after-sales service team for our timber deckings and outdoor landscaping, supported by an overall CSR approach. We thus ensure the preservation of resources, safety and the personal development of our teams, all while creating warm spaces that promote holidaymakers' well-being.

A rewarded and structured commitment

In 2024, Biscabois obtained the « Committed CSR » label (progress level) issued by AFNOR. This official recognition validates the seriousness of our actions across all our activities : governance, diversity, resource management and carbon footprint reduction. It is a milestone that structures our dynamic for the years to come around 4 fundamental commitments :

- **Looking after the team :** ensuring that our employees work in safe conditions, feel well and thrive.
- **Respecting our clients :** listening to them, keeping our quality promises and simplifying every project, from A to Z.
- **Protecting nature :** reducing our carbon footprint, favouring sustainable wood and giving our waste a second life.
- **Working in mutual trust :** building honest, ethical and sustainable relationships with all our partners.

2. Environment : preserving resources and the climate

Carbon footprint : measuring to act better

In 2025, we measured our carbon footprint across all our 2024 business activities (Scopes 1, 2 and 3), which amounts to 6,350 tCO2e (i.e. 285 tCO2e per million euros of turnover). This analysis shows that 98% of our emissions are concentrated on 3 major levers: our raw material purchases (65%), freight and transport of goods (30%), and employee travel (3%). The other items (end of life of products, capital equipment, energy and waste) remain very minor and represent less than 2% of total global impact.

Responsible wood sourcing

In 2025, our purchases reached 9 032 m³, all wood species combined. Pine represents 95.7% of our volumes and 100% of our pine comes from controlled sources, which guarantees its provenance exclusively from sustainably managed forests, respecting biodiversity and local communities.

For the remaining 10%, mainly consisting of eucalyptus, we apply the same requirement of transparency despite local regulations differing from European standards. Our partners commit to excluding any illegal or controversial source through our supplies, largely certified FSC, which also support local socio-economic programmes (Black Economic Empowerment). Finally, to ensure compliance with these requirements, we evaluate our sourcing every year by carrying out a direct on-site visit.

Valorising our wood waste

Biscabois is actively involved in reducing and recycling its industrial waste. In 2025, we collected 21,380 tonnes of mixed waste, shredded for the production of recycled solid recovery fuels; 74,220 tonnes of timber were shredded to be valorised into particle boards.

Running on alternative fuel

For over 15 years, we have been updating our vehicle fleet (all compliant with Euro 6 standards). Even further, we have installed our own alternative fuel tank on-site. In 2025, 100% of our utility vehicles ran on HVO100 from ALTENS (a fuel derived from used cooking oils which emits 82% less CO2 than standard diesel), with occasional top-ups. This overall approach allows us to save 187 tonnes of CO2 per year on average.

3. Social : commitment, equality and daily cohesion

Safety and prevention on the ground

Protecting our teams and moving forward together in the same direction is our priority. In terms of health and safety, our efforts on the ground resulted in a carbon footprint assessment in 2025. To maintain this result, we continually invest in targeted training (general safety, first aid, driving machinery, fire safety, road safety) and maintain the wearing of Personal Protective Equipment (PPE).

Quality of work life and equality

This commitment to people is reflected in our 2025 QWL (Quality of Work Life) questionnaire feedback. With strong participation from our teams, our overall well-being is rated at 8.08/10, while the the feeling that work is meaningful is rated at 8.22/10. Regarding gender equality, our management committee has achieved full gender parity. While our field-based roles, such as installers and site managers, currently attract only male candidates due to travel requirements, we remain committed to promoting gender diversity and to pursuing a transparent approach, with future monitoring through the Gender Equality Index.

Social dialogue, well-being and team spirit

To bring our community to life, we rely on local social dialogue with our CSE (Social and Economic Committee). Convinced that internal communication is the key to moving forward together in the same direction, we share company news transparently through collaborative tools connecting all our teams, whether office- or site-based.

4. Governance & clients : building relationships of trust

Attentive client listening and responsive after-sales service

We systematically analyse our clients' experiences via the Eval'n'go platform. In 2025, their feedback highlighted an overall satisfaction rating of 9.08/10 and a recommendation likelihood of 9.20/10.

Faced with the challenges inherent in building sites, our teams are available by phone or email and are committed to quickly resolving any technical defect falling under our responsibility.

Responsible purchasing and committed partners

Our business vision is based on healthy and honest relationships. Since early 2026, all our partners and suppliers have signed a responsible purchasing charter, thereby committing to respecting human rights, limiting their environmental footprint and acting ethically. In parallel, a survey is underway to evaluate their own practices (energy, waste management, CSR criteria) in order to guarantee a transparent, responsible supply chain geared towards continuous improvement.

EUCALYPTUS RANGE

Driftwood inspiration to enhance spaces

For two years, eucalyptus has been making its mark in the world of Open-Air Hospitality thanks to its driftwood look with uneven curves reminiscent of vast Pacific beaches. Its naturally rot-proof and resistant qualities make this wood a major asset in campsites. Biscabois eucalyptus range adapts to all configurations through the use of barked log rounds of various diameters and lengths, offering great technical flexibility and enabling unique designs. Its soft, light colour opens up numerous possibilities, both in the combination of materials and in outdoor decorative trends.

• EUCALYPTUS DECKING

The eucalyptus decking is custom-designed with a 21 or 28 mm pine wood floor to guarantee optimal comfort and enhanced safety. Only accessories such as balustrades, privacy screens and the cover are made of eucalyptus, allowing clients to play with their imagination and customise the arrangement of the branches, spacing them out or placing them closer together, to create a unique decking.

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 3.00 m
Cover	6.00 x 3.00 m • Eucalyptus
Serge Ferrari Canopy	Soltis Proof W96 Microperforated ratchet tensioned fabric
Colours	Sand (Several colours available p.35)
Floor	28 mm thick pine
Railings	Eucalyptus • Height 1.00 m
Stairs	3 steps with risers
Skirting	1 board

The technical specifications correspond to the project presented in the image

• EUCALYPTUS PERGOLAS

Available in standard dimensions of 3.00 x 3.00 m, 4.00 x 3.00 m and 4.00 x 4.00 m, the eucalyptus pergola is practical and aesthetic while also being modular, as it can be assembled side by side according to client needs. For relaxation areas or dining corners, the eucalyptus pergola can be completed with a PVC or microperforated protective shading fabric, an elegant solution to protect against bad weather and UV rays.

The installation of a shading sail is only possible on pergolas without a roofing panel

TECHNICAL SPECIFICATIONS	
Post diameter	75 - 100 mm (x4)
Post height	2 400 mm (x4)
Header diameter	75 – 100 mm (x4)
Header length	2 800 mm (x4)
Roof panel size	1 000 x 3 000 mm (x3)
Panel round log diameter	25 – 32 mm (x2)
Diameter of small and large ties	50 – 75 mm (x4)

• EUCALYPTUS FENCING

Our eucalyptus fences are part of a decorative and functional approach to landscaping your outdoor spaces. They make it possible to mark out the boundaries of a plot or create divisions between spaces, and for greater modularity, the panels can be aligned or arranged at an angle.

TECHNICAL SPECIFICATIONS	
Height	120 / 180 cm
Length	200 cm

MOBILE HOME DECKING

Our mobile home decking suits your budget

Wooden decking is an essential complement to a mobile home : it offers an additional open-air living spaces that is private and comfortable in all seasons. Choices of mobile home decking vary according to desires and budget : classic decking, podium decking or round log decking, make your choice and share your project with us, and we will support you from design to installation.

Our decking is installed at door-threshold level or low-cladding level depending on your specifications or the slope of the ground.

• CLASSIC OPEN DECKING

Classic, timeless and natural

Enjoy the minimalist and timeless aesthetic of our simple mobile home decking. With its traditional railings and classic stairs, this decking allows you to enjoy the sunshine all day long and open up all your spaces. Without a cover, it offers a total connection with the environment.

Biscabois offers all dimensions of standard classic decking ranging from 2.60 m or 3.00 m in depth for lengths ranging from 3.00 m up to 10.50 m, in 1.50 m modules.

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 3.00 m
Floor	21 mm thick pine
Railings	Traditional Height 1.00 m
Stairs	3 steps

The technical specifications correspond to the project presented in the image.

• SEMI-COVERED CLASSIC DECKING

Classic, practical and comfortable

Our semi-covered decking offers a practical and comfortable aesthetic thanks to its traditional railings, classic stairs and partial cover, allowing you to enjoy both shade and light, a balance of coolness and warmth, for pleasant moments in the open air.

Depending on the chosen decking length, you have the option of partial coverage depending on the openings of your mobile home (doors, windows, etc.).

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 3.00 m
Cover	3.00 x 3.00 m • Classic
Serge Ferrari Canopy	Flexlight Classic 602 smooth PVC drop-down valance
Colours	White (Several colours available p.35)
Floor	28 mm thick pine
Railings	Traditional Height 1.00 m
Stairs	3 steps

The technical specifications correspond to the project presented in the image.

• COVERED CLASSIC DECKING

Classic, soothing and elegant

Make the most of the outdoors while staying protected thanks to the covered decking, creating a restorative space for your moments of relaxation in the open air. With its traditional railings, classic stairs and full cover, this decking integrates harmoniously into its environment, adding a touch of elegance to your outdoor space.

The classic covered decking is available with either a canopy with a scalloped or straight valance, or a tensioned fabric roof (to be specified when requesting a quotation).

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 3.00 m
Cover	6.00 x 3.00 m • Classic
Serge Ferrari Canopy	Soltis Proof W96 Microperforated tensioned fabric
Colours	Grey (Several colours available p.35)
Floor	21 mm thick pine
Railings	Traditional Height 1.00 m
Stairs	3 steps

The technical specifications correspond to the project presented in the image.

• OPEN PODIUM DECKING

Perfect transition between the mobile home and its environment

Podium decking offers a modern perception of mobile home decking. Without railings or enclosures, and featuring stairs on 3 sides with risers, it provides direct and unobstructed access to the environment. Podium decking offers a streamlined design and creates an elegant, functional and contemporary outdoor spaces.

The number of steps on a simple podium decking depends on the packing height of the mobile home. A flat plot of land will therefore be essential for the successful execution of the project.

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 3.00 m
Floor	21 mm thick pine
Stairs	3-step podium with risers
Stairs depth	75 cm

The technical specifications correspond to the project presented in the image.

• SEMI-PODIUM SEMI-COVERED DECKING

A balance between surroundings and privacy

The semi-podium decking is the harmonious combination of a semi-covered decking and an extended podium staircase. This layout allows you to play with the spaces, offering both privacy and openness to the surroundings. The semi-podium decking is a pleasant solution for holidaymakers who wish to enjoy a versatile and attractive space.

It is essential that the ground is flat in order to guarantee the correct installation of the decking or the podium staircase.

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 3.00 m
Cover	3.00 x 3.00 m • Classic
Serge Ferrari Canopy	Scalloped drop Flexlight Classic 602 smooth PVC
Colour	Vanilla (Other colours available, p. 35)
Floor	21 mm thick pine
Railings	Traditional 1.00 m high
Stairs	3-step semi-podium with risers

The technical specifications correspond to the project presented in the image.

• COVERED LOG DECKING

Relax timelessly with the log decking

Offer your clients a change of scenery by opting for a decking made from milled log wood. Whether for the cover, railings or privacy screens, this style will give an authentic identity to your establishment and spark the desire to travel through time while relaxing.

You can add a privacy screen to your log decking and position your stairs wherever suits you best.

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 2.50 m
Cover	6.00 x 2.50 m • Logs
Serge Ferrari Canopy	Ratchet tensioned canopy Soltis Proof W96 Micro-perforated
Colours	Sand (Other colours available, p. 35)
Floor	28 mm thick pine
Railings	White nets • 1.00 m high
Stairs	3 steps

The technical specifications correspond to the project presented in the image.

• FACE-TO-FACE TRIBE DECKING

Comfort in complete privacy

The face-to-face tribe decking is a custom-made central decking nestled between two mobile homes. Spacious and comfortable, it is perfectly suited for family or friends' holidays. Covered with a Serge Ferrari protective canopy, the face-to-face tribe decking can be arranged according to your wishes (relaxation area, resting space, etc.).

The face-to-face Tribu decking requires careful installation, which depends in particular on the correct positioning and levelling of the mobile homes. We strongly recommend strictly following the mobile home layout plan provided by Biscabois.

TECHNICAL SPECIFICATIONS	
Decking	6.00 x 6.00 m
Cover	6.00 x 6.00 m • Double pitch
Serge Ferrari Canopy	Ratchet tensioned canopy Soltis Proof W96 Micro-perforated
Colour	Grey (Colours available, p. 35)
Floor	28 mm thick pine
Railings	Cladding
Privacy screens	Cladding
Stairs	2 steps with risers

The technical specifications correspond to the project presented in the image.

• L-SHAPED TRIBE DECKING

Well-being surrounded by nature

The L-shaped tribe decking is a comfortable and spacious decking that offers the juxtaposition of two mobile homes around a central decking open to the environment. You can customise this decking with numerous options, ranging from the private jacuzzi to a pergola, benches or even an outdoor shower, for 100% wellness open-air holidays.

As with the face-to-face Tribu decking, it is essential to ensure that the mobile homes are correctly positioned and levelled, and to refer to the layout plan provided by Biscabois. In addition, you can choose between brown-stained and green-stained wood.

IMAGINE, CUSTOMISE, BRING TO LIFE!

BESPOKE DECKING

Bespoke decking for innovative projects

Biscabois listens to all clients with innovative projects and makes available a design office that intervenes ahead of all construction sites requiring technical and aesthetic research. Whether your ideas are clear or imprecise, our designers create a 3D plan around your thoughts, while considering the environment upon which the project depends.

In the case of a decking with an integrated pool or jacuzzi, we recommend installing a compliant gate for maximum safety.

U-shaped premium decking in front of a chalet, on the edge of the forest. *Creation of relaxation and comfort areas spread over two levels. Dining area, Nordic bath, suspended net and tensioned canopy combine harmoniously to offer an area of 30 m², combining functionality and conviviality.*

A structured and elegant outdoor *space with a rectangular mobile home decking of 60 m², entirely covered by an open-slat pergola, offering both protection and aesthetics. Sliding privacy screens, combined with open railings in a 2 m alignment, ensure an ideal balance between discretion and proximity to nature.*

Inside, a welcoming space designed for sharing and comfort *combining dining areas with spaces for relaxation. The wooden plancha unit blends seamlessly into the overall design, enhancing the conviviality and functionality of this warm and inviting living space.*

***Stilted decking designed in pine for the flooring**, stairs and framework, with eucalyptus railings, handrails, stair rails and privacy screen. This model offers two distinct levels: a functional lower space, and an upper space offering an unobstructed view of the surroundings.*

Enjoy the landscape from the upper floor of the stilted decking. *Designed as a solarium open to the horizon, this elevated space offers breathtaking views and combines comfort, safety and total immersion in the natural environment.*

Enjoy sociable moments with family or friends *on the lower area of the stilted decking. Directly accessible from the mobile home, it offers daily comfort and cleanliness.*

CANOPY AND PROTECTIVE SHADES

in collaboration with Serge Ferrari

Covers • *p.32*

Side panels and facades • *p.36*

COVERS AND PROTECTIVE SHADES

• COVERS

The warmth of wood and the lightness of fabric for a perfect match

Biscabois mobile home decking covers allow you to enjoy the outdoors while being protected from the sun and bad weather. Composed of a wooden framework supporting a Serge Ferrari protective canopy, you can customise the style by blending wood and fabric for a balanced and harmonious result.

Waterproof micro-perforated Soltis Proof W96 canopy

CLASSIC COVER

The classic cover accommodates Serge Ferrari canopy with straight or scalloped drops for the finish. The roof canopyare fixed using bungee cords and velcro, like the side panels and facades, which help protect the decking from the weather.

TENSIONED CANOPY COVER

The tensioned canopy cover accommodates waterproof and micro-perforated Serge Ferrari canopyes. The structure of the cover allows the canopy to be tensioned using an eyelet and bungee cord fixing system, offering excellent wind resistance.

OPEN-SLAT COVER

The open-slat cover creates a graphic effect with its parallel segments, playing with shadows and light. It can be installed on all mobile home decking or directly onto a decked decking to give it a pergola-like appearance.

EUCALYPTUS COVER

The eucalyptus cover will captivate you with its unique driftwood-style curves. This cover adapts to all types of decked deckings and can be paired with a Serge Ferrari tensioned canopy for perfect harmony.

CLASSIC TENSIONED CANOPY COVER WITH RATCHETS

The classic tensioned canopy cover accommodates all Serge Ferrari canopyes. Following the same technical process as the tensioned canopy cover, the canopy is secured at the rear by a rod in a tensioned aluminium channel, while tension is achieved using stainless steel ratchets and straps at the front of the cover.

LOG TENSIONED CANOPY COVER WITH RATCHETS

The log tensioned canopy cover accommodates all Serge Ferrari canopyes. Featuring the same technical process as the classic tensioned canopy cover, canopy retention is made possible thanks to tension achieved using stainless steel ratchets and straps.

• ROOF CANOPY

Combine protection, comfort and strength

Biscabois offers a selection of canopies made from 100% Serge Ferrari fabric. These canopies guarantee technical and aesthetic performance and adapt to all types of deckings, whether they are classic, customised or bespoke. Roof canopyes, side panels, facades or accessories: set the tone, play with contrasts, stripes or plain, and define the look you want to give to your environment.

OUTDOOR LIVING SPACES

Aesthetic, functional and durable landscaping

Biscabois supports campsites in creating their wooden outdoor living spaces.
Whether for a deck, a pergola, a wooden framework, a stage, an outdoor decking or even an aquatic facility, these installations require thoughtful design to ensure consistency throughout your open-air facilities. Our sales teams, design office and site teams will support you in making the most of your spaces.

CHECKERBOARD FLOORING

A modern, graphic and versatile flooring

Biscabois presents its latest innovation: checkerboard flooring with a modern and graphic design that brings a unique aesthetic to your outdoor spaces and can be used just as well for cultural and sports activities as for dining and relaxation areas. This checkerboard flooring can also accommodate a pine or eucalyptus pergola for added functionality.

LANDSCAPED DECKING

Connection with nature and bespoke harmony

Our landscaped deckings aim to harmonise with their natural environment while offering practicality and comfort. Above, a configuration dedicated to relaxation features flooring with a graphic design upon which pergolas equipped with eucalyptus or Serge Ferrari solar protection canopiesare installed. Benches and cushions help create a welcoming atmosphere, while planters and fences add extra warmth, inviting guests to fully enjoy the spaces.

POOL DECKING

Enhance your aquatic spaces

Aquatic spaces integrated into open-air establishments are an essential criterion for appealing to demanding holidaymakers. To create a unique experience, invest in the comfort of your wooden landscaping for a flawless finish. Whether involving one or several pools, indoors or outdoors, Biscabois offers you bespoke landscaping solutions that meet both your technical needs and your aesthetic desires.

OPEN-SLAT PERGOLA

The must-have for campsites : the open-slat pergola

The open-slat pergola is a wooden structure that offers a play of shadows and light for your outdoor landscaping. Used for dining or relaxation areas, the pergola is custom-designed according to your needs and comes in all dimensions. You can add a translucent high roof canopy which will provide extra waterproof protection. To have breakfast in peace, get together in the cool around a drink or simply relax, the pergola is the ideal solution to create living spaces while optimising spaces.

ENTERTAINMENT AND SHOW STAGE

Enhance your entertainment and events

Shows and entertainment are frequent during the summer season, and open-air establishments pull out all the stops to create colourful and festive atmospheres. Integrating a bespoke show stage then becomes a key element to highlight the most striking events. Our design office offers aesthetic solutions adapted to your budget to create a stage that will captivate your audience.

FRAMEWORK AND STRUCTURE

Quality and expertise for creating frameworks and structures

Biscabois' timber framing teams are recognised for their expertise in creating frameworks and structures. Each project is approached with attention to detail and craftsmanship, guaranteeing quality results. Whatever your project, our carpenters combine creativity and precision to design solid and durable structures. Above, the creation of a spacious stilted decking offering a breathtaking view of the environment and allowing the usable surface to be doubled.

TECHNICAL ROOM

Solid, durable and functional structures

Our team of carpenters is specialised in the design and installation of functional technical rooms allowing you to store equipment necessary for open-air establishments. Whether you need a storage room or a specific technical building, Biscabois offers you bespoke and adapted solutions.

OPTIONS AND ACCESSORIES

Find on these pages all the accessories and options offered by Biscabois that you can integrate into your mobile home decking and outdoor landscaping. Skirting boards, railings, covers, disabled access ramps, benches or even planters... Choose what you need and share your project with us: our teams are at your disposal to support you in this personalised approach.
